

The Quill™ Knotless Tissue-Closure Device

- Indicated for soft tissue approximation
- As secure as an interrupted closure, without having to tie knots
- Reduces potential for knot-related complications
- Simple sizing conversion: upsize by 1 suture size to ensure equivalent tensile strength
- Available in unidirectional and bidirectional configurations

The Quill™ Device Is A Revolutionary Product With A Proven Track Record

- More than 20M Quill™ Devices sold to date
- More than 80 published studies since 2006
- Supported by an increasing number of animal studies

A Comprehensive Knotless Tissue-Closure Device Portfolio

- Leading manufacturer of barbed suture technology with the largest portfolio of both bidirectional and unidirectional configurations
- Broad range of absorbable and non-absorbable materials and configurations including Monoderm™, PDO and Polypropylene
- More than 100 SKUs available in sizes 4-0 to 2
